Professional Summary

Front-End Developer with strong foundations in **HTML5, CSS3, JavaScript (ES6+), and TypeScript**, combined with 5+ years of professional experience in software quality engineering. Experienced in building responsive, scalable web applications using modern front-end practices and integrating RESTful APIs.

Transitioned from QA to development, bringing deep expertise in debugging, performance optimization, test-driven practices, and cross-functional collaboration. Demonstrated this through independently building and deploying production-ready projects — including **Maptor** (maptor.ca), a full-stack route optimization tool using React 19, Node.js, and Google Maps APIs, and **SplitStar** (splitstar.app), a group expense-splitting app featuring JWT authentication, MongoDB, and a responsive Material-UI interface. Both applications are live and reflect a strong command of full-stack development, secure API design, and modern deployment practices.

Strong understanding of Git-based workflows, Agile development, and delivering production-ready applications — with a personal portfolio at **akashparmar.me**.

Core Skills

- **Front-End Technologies:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Bootstrap, Responsive Design
- **Back-End & API Integration:** Node.js, Express.js, RESTful APIs, MongoDB
- **Version Control & Tools:** Git (feature branching, pull requests, code reviews), GitHub, Postman
- **Testing & Quality Engineering:** Selenium, Test Automation, Manual & Automated Testing, Defect Lifecycle Management
- **Development Practices:** Agile/Scrum, Test-Driven Development (TDD), Performance Optimization, Cross-Browser Compatibility

Experience Summary

Web Developer Freelancer

2024 – Present

- Built multiple personal projects including a portfolio site and a mock e-commerce platform.
- Developed and deployed RESTful APIs with Node.js, Express, and MongoDB, and successfully deployed apps on Heroku and Netlify.
- Enhanced UI responsiveness with Bootstrap and custom CSS while improving skills in asynchronous programming and performance optimization.
- Deployed projects on cloud platforms (Heroku, Netlify) with optimized UI responsiveness using Bootstrap and CSS.

Junior Quality Assurance Analyst,

Broadridge Financial Solutions, Toronto

2021 – 2024

- Conducted performance testing, defect analysis, and SQL data fixes for financial applications.
- Collaborated with analysts and developers to resolve bugs and improve system stability across multiple banking clients.

Senior Quality Assurance Analyst,

Lodestone Software Services (Tech Mahindra), Ahmedabad

2018 – 2019

- Led a team of 5 QA professionals, created test plans, executed manual and automated tests, and designed comprehensive test scripts.
- Reduced defect leakage by 35% and automated 50% of repetitive test cases, improving efficiency and quality.
- Experience collaborating across teams to deliver high-quality, stable, and scalable applications in both agile and traditional environments.

Projects

[Maptor | maptor.ca](https://maptor.ca)

A full-stack web app that optimizes multi-stop routes and generates a ready-to-open Google Maps link — no account required.

- Reorders intermediate stops using a nearest-neighbour algorithm

- Address autocomplete via Google Maps Places API; supports text, coordinates & short URLs

- Travel mode selection: driving, walking, cycling, and transit

- API keys kept server-side — never exposed to the frontend

Tech Stack: React 19, Webpack 5, Node.js, Express 5, Google Maps APIs | Deployed: GitHub Pages + Render

[SplitStar](#) | [splitstar.app](#)

A modern full-stack web app for group management and expense splitting with robust security features.

- JWT authentication with secure password hashing (bcrypt)

- Dynamic group creation, member management, and real-time expense tracking

- Responsive glassmorphism UI with offline demo mode and graceful fallback handling

- RESTful API with Joi validation, Winston logging, Helmet, rate limiting & CORS

Tech Stack: React 19, Vite, Material-UI, Node.js, Express.js, MongoDB (Mongoose) | Security: JWT, bcrypt, Helmet

[akashparmar.me](#) | [akashparmar.me](#)

Personal developer portfolio showcasing projects, skills, and professional journey.

Tech Stack: HTML5, CSS3, JavaScript — fully responsive design

Education

Conestoga College

Sep 2019 – Dec 2020

Graduate Certificate in Enterprise Content Management

GPA: 3.83 (Distinction)

Gujarat Technological University

Mar 2012 – May 2017

Bachelor's Degree in Computer Science and Engineering

GPA: 3.0

Certifications

The Web Developer Bootcamp 2025 – Udemy

Sep 2025

Selenium Python - Step by Step for Beginners with Framework – Udemy

Mar 2021
